

## **Innovative and reliable partner for 30 years: inomed Medizintechnik GmbH celebrates company anniversary**

### **From a start-up to a globally operating medical technology company**

As a pioneer in the field of nerve monitoring, inomed Medizintechnik GmbH can look back on a 30-year success story in the development of innovative products in the neuro field. Founded on 11 November 1991 by Rudi Mattmüller and Dieter Mussler in Teningen, the two-man business has developed into a strong corporate group over the last three decades. This group now includes 300 employees worldwide, six international branches, the two subsidiaries ARKANA Forum GmbH and inomed NeuroCare Unit (iNCU) GmbH at the headquarters in Emmendingen as well as a large network of trained distributors in over 90 countries.

Thanks to its focus on internationalisation during the last years, the corporate group now generates 70% of its turnover through exports. In addition, inomed guarantees a stable and flexible supply chain at the highest technical level through its long-term cooperation with local companies. The company's positive development in the last decades as well as the continuous growth of employees confirm the importance of inomed in the region as a successful and internationally acting medium-sized company and an attractive, reliable employer. "Our suppliers and highly motivated, well-trained employees stand for the innovative strength of our region and we are always looking for new dedicated talents for various departments," emphasises Jörg Wipfler, CTO, with regard to the company's strong development opportunities.

### **Looking back and into the future**

The 30<sup>th</sup> anniversary of the company will be celebrated on 8 July 2022 with a big summer party. At this event, the management, together with employees and invited guests, will remember milestones in the company's success story and at the same time take a look into the future.

"The company will continue to develop in many ways," predicts Rudi Mattmüller, CEO. "On the one hand, we will open up new markets, on the other hand, we will expand our range of applications and develop new products based on various research cooperations."

Mariusz Gruchala, Managing Director Marketing & Sales, underlines the importance of the company's international orientation: "I see internationalisation as the main goal of marketing and sales, and we are continuously pursuing this goal by opening two new branches per year."

### **Intraoperative nerve monitoring as core competence**

inomed is one of the world's leading companies in the field of intraoperative neuromonitoring (IONM). IONM is used in a variety of application fields to monitor nerves during operations and thus reduce the risk of nerve damage and secondary diseases.

#### **inomed Medizintechnik GmbH**

inomed develops, manufactures and distributes medical technology products in the fields of intraoperative neuromonitoring, functional neurosurgery, pain treatment and neurological diagnostics. For 30 years, inomed devices have been helping to improve treatments and increase patient safety. 300 employees, six international branches, two subsidiaries and a large network of trained distributors in over 90 countries form part of the inomed group.

Other business units include functional neurosurgery, pain treatment and neurological diagnostics. Every year, more than 500,000 patients in over 5,000 clinics worldwide benefit from the use of inomed products, which help to improve treatment results and provide safety for both physicians and patients.
