# Protecting what's precious

New and updated C2 Xplore software

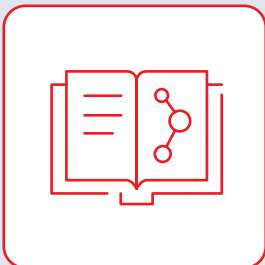

## ENT

- On-screen event threshold adaptation
- Mute noisy channels on the go
- Advanced ENT signal detection
- Dedicated Hypoglossal programs for obstructive sleep apnoea surgery

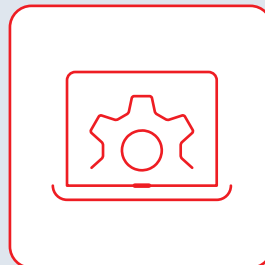

inomed est. 1991

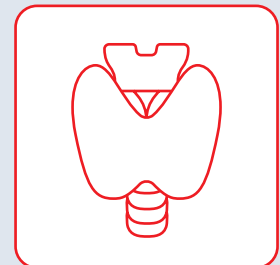

## INOGUIDE

- Intuitive control: Introducing a step-by-step guide for each surgery
- Fast & easy: From setup to measurement in no time in every surgery
- User-friendly: Standardises the workflow for maximum flexibility in the operating theatre

## GENERAL

- Edit, tailor & manage your programs with the new program manager
- Automatic event and artefact differentiation for a better overview during surgery
- Improved sound settings and the option to mix EMG and synthetic tones
- Advanced bilateral SEP

## THYROID

- ALM technology got even better with Thyroid+
- Thyroid+ now offers free-running EMG with spontaneous nerve activity recording
- Dedicated Neck Dissection programs
- Advanced signal detection
